AMENDMENT UNDER 37 C.F.R. §1.116 TECHNOLOGY CENTER 2800

Sir:

In response to the Office Action dated December 26, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend the claims as follows:

1. (Amended) A liquid crystal display device comprising:
 - a first substrate formed with display pixel electrodes thereon, said first substrate having a first irregular surface including line-shaped protrusions extending in one direction;
 - a second substrate arranged in an opposing relation to said first substrate, said second substrate having a second irregular surface including line-shaped protrusions extending perpendicularly to said one direction; and
 - liquid crystal disposed between said first substrate and said second substrate, wherein said line-shaped protrusions along a drawing direction of a raw glass substrate are formed due to a direction dependency of a thickness of the raw glass substrate.
